

Full Stack Developer | Java, Spring Boot & Microservices | DevOps & Cloud | Generative & Agentic AI

Email: abdul.habeeb2025@gmail.com

Profile

Senior Software Engineer with 14+ years of experience designing and delivering scalable enterprise applications using Java, Spring Boot, Microservices, AWS, Kubernetes, Docker, and CI/CD. Proven track record of improving performance, strengthening security, and automating deployments across complex environments. Strong background in full-stack development, cloud modernization, and AI-powered solution integration.

Professional Experience

SPR Systems Pvt Ltd, Jun 2025 to Dec 2025

Senior Developer

- Migrated 10+ applications from GitLab to GitHub with zero production downtime
- Redesigned CI/CD pipelines using GitHub Actions, reducing deployment time by 40%
- Migrated application secrets to HashiCorp Vault, improving security compliance by 100%
- Implemented Docker containerization and Kubernetes deployments for scalable environments
- Performed sanity testing across environments and ensured successful production sign-offs

Nisum Consulting Pvt Ltd, Mar 2023 to Mar 2024

Principal Software Engineer

- Developed reactive microservices using Spring WebFlux, improving system throughput by 2x
- Optimized APIs to achieve <500ms response time under load (5+ TPS)
- Implemented CI/CD pipelines using GitHub Actions & Jenkins, reducing manual effort by 60%
- Resolved critical security vulnerabilities (SQL Injection, XSS) achieving 100% compliance
- Led offshore team of 5 developers, ensuring high-quality code through PR reviews

Citicorp Services India Pvt Ltd, Jun 2022 to Jan 2023

IT Analyst

- Developed microservices for cards module using Spring Boot
- Built internal developer utility tool integrating Jenkins, SonarQube, and Checkmarx
- Automated unit test generation using DiffBlue, improving coverage by 35%
- Managed vendor team deliverables and ensured on-time sprint releases

Cognizant, May 2020 to Jun 2022

Senior Associate

- Developed UI (Angular) and backend REST APIs for Ford applications
- Improved code quality by resolving SonarQube issues and enforcing best practices
- Led team of 5 members and managed estimations across project lifecycle
- Performed unit and integration testing to ensure application stability

STG Infotech, Feb 2018 to Apr 2020

Systems Analyst

- Migrated legacy applications to OpenShift using Docker and Jenkins pipelines
- Converted binaries into containerized applications, improving deployment efficiency by 50%
- Automated build processes using Gradle and CI/CD tools

Wipro / AIT / TCS, Sep 2006 to Sep 2016

Consultant / System Engineer

- Developed enterprise banking and retail applications using Java/J2EE
- Performed performance tuning using thread and heap analysis
- Supported production systems (L2/L3) ensuring high availability

Education

Visveswaraya Technological University

Bachelor of Engineering (Computer Science)

Areas of Expertise

- | | | | |
|--------------------|-------------------|-------------------|-------------------|
| • Java (8, 11, 17) | • Spring Boot | • Spring WebFlux | • Hibernate |
| • Microservices | • REST APIs | • GraphQL | • Angular 9 |
| • HTML5 & CSS | • OAuth 2.0 | • Bootstrap | • AWS |
| • Azure | • Spring Security | • Docker | • Kubernetes |
| • OpenShift | • GitHub Actions | • Jenkins | • MongoDB |
| • PostgreSQL | • Oracle | • DB2 | • MySQL |
| • OWASP Top 10 | • Veracode | • Checkmarx | • HashiCorp Vault |
| • Kafka | • JMS | • IBM MQ | • Grafana |
| • AppDynamics | • Splunk | • Python | • LangChain4j |
| • RAG | • n8n | • Vector Database | • AI Agents |
| • Terraform | • FlyWay | • Spring | • Spring AI |

Certifications & Learning

Certificates issued by be10x:

AI Tools Workshop

Hands-on experience with modern AI tools

AI Fundamentals & Ecosystem

Core AI concepts and architecture

AI Product Building & Analytics

Data-driven product development

AI Agents & Automation Systems

Workflow automation and AI agents

Certificates issued by Anthropic:

AI Fluency Framework & Foundations
